

Diesel Key info and specification.

Manufactured to **ISO 9001-2000** , **TS16040** & **ISO14001** standards

Stainless Steel Components **UK BSI 301S21**

Plastics <POM> Acetal **ISO 9988-1** Plastics-Polyoxymethylene (POM) Moulding and Extrusion

Rubber Seals **NITRILE** **BS ISO TR 6809:1996**

All of the above is a requirement for automotive type approval and complies to all UK and EU regulations.

ACETAL POM

Mechanability is often used for a wide variety of technical applications. Acetal pom or acetal polyoxymethelene products is versatile designed engineering product that is designed to withstand high stress. These acetal products are also characterized as being highly elastic, good creep resistant and wear resistant. Because of all these unique qualities possessed by acetal pom today they are used in the manufacture of a number of industrial products like bearings, gears, conveyer belts, valve stems, pump impellers, carburettor bodies, bushings, casing components etc. Apart from these, these plastic products exhibit good amount of toughness, elasticity and stability properties which is why they are immensely applied in many applications. today there is a huge demand for such high quality products among many industries.

The fitting you have have been designed specificaly for MERCEDES-BENZ Vans all models , also fits Volkswagen LT and Crafter.

Thatcham accreditation starts 1st week may for this version and also the screw fitting.
